

**16-0-2**  
**WITH AMMONIUM SULFATE**  
**AND STABILIZED NITROGEN**

**GUARANTEED ANALYSIS**

Total Nitrogen (N) .....	16.0%
1.61% Ammoniacal Nitrogen	
2.40% Water Insoluble Nitrogen*	
11.96% Urea Nitrogen**	
0.03% Other Water Soluble Nitrogen	
Soluble Potash (K2O) .....	2.0%
Calcium (Ca) .....	1.0%
Sulfur (S) .....	2.0%
2.0% Combined Sulfur (S)	

**DERIVED FROM**

Hydrolyzed feather meal, urea nitrogen, ammonium sulfate, meat meal, sulfate of potash and blood meal.

\*This product contains 2.40% Water Insoluble Nitrogen from hydrolyzed feather meal and meat meal.

\*\*This product contains 11.96% stabilized nitrogen with N (n-butyl) thiophosphoric trimide.

**GENERAL INFORMATION**

Nature Safe's 16-0-2 is recognized as Triple Play Fertilizer because of a unique blend of three distinct nitrogen sources. The product is based on the slow release organic nutrition of our high quality animal proteins containing over 12% amino acids. In addition, ammonium sulfate is incorporated into the organic base to improve both color and growth response. Lastly, the product blends 25% stabilized urea into the formulation to further improve the initial 45 day fertility response and reduce nitrogen volatility. The organic ingredients will deliver a slow and consistent release for 8 weeks. The Nature Safe 16-0-2 is a cost effective solution for lawn care, municipalities, sports turf, golf courses and other turf applications.

**DIRECTIONS FOR USE**

Apply 3.13 to 6.25 lbs. per 1000 sq. ft. (0.5 to 1 lb. of actual nitrogen per 1000 sq. ft.). Application intervals can range from 45 to 90 days. Do not feed to animals. Wash hands after handling and before eating or smoking.

Not for use in organic crop and organic food production.

Available in SGN Coarse (220-230)  
Available in Net Weight 50 Lbs.
