

Turf King Fertilizer

MAXX-PHITE 0-0-29

MAXX-PHITE is a formulated fertilizer treatment for summer stress in turfgrass and contains potassium phosphite. This product is intended to be used as a supplement to a well-balanced fertilizer program. It is not intended to be a substitute for sound fertilization and conventional cultural practices. Thorough coverage of foliage is necessary for best results when used as a foliar treatment.

Precaution: Avoid foliar application under extremes of climate or stress. Exercise precautions to prevent potential root or foliar burning. Use sufficient water to ensure thorough coverage. Do not mix with copper-based fungicides if the pH of the spray solution is below pH 6.

Guaranteed Analysis

Soluble Potash (K₂O)..... 29.00%
 Available Phosphate (P₂O₅)..... 0.00%

Derived from: Phosphite

This product contains **8.16 lbs.** per gallon of 56% Mono-and-dipotassium salts of phosphorous acid. Made with Virgin Phosphorous Acid and tech grade Potassium Hydroxide.

Application	Rate	Frequency
Cool Season Turf		Apply every 2 weeks in a min.
Fairways	2-4 oz. per 1000 sq. ft.	1.5 g. of water per 1000 sq. ft.
Greens, Tees	2-4 oz. per 1000 sq. ft.	Apply every 1 to 2 weeks
Sports Turf	3-4.4 oz. per 1000 sq. ft.	Apply every 2 to 4 weeks

IMPORTANT: Please compare to other Foliar Phosphite products. There is a difference!

- How many pounds per gallon of active ingredient are you getting? **THIS IS HUGE.** Most products only offer 4-6 pounds per gallon of active ingredient which means more product is required overall to achieve effectiveness.
- Is the product made with Virgin Phosphorous Acid?
- Is the product TECH Grade Potassium Hydroxide? Or is it Sodium Hydroxide?
