

Commercial Turf Sales & Service

Turf King

Cal Plus

- Turf King Cal Plus is an enhanced calcitic lime that is more effective than regular lime. It can increase pH up to 4 times faster than traditional pelletized lime products.
- Cal Plus helps maintain proper soil pH, improves soil texture, reduces soil compaction, and creates a better environment for the proliferation of beneficial bacteria.
- Turf King Cal Plus promotes plant health to reduce disease pressures and helps to provide resistance to heat and traffic stress.
- Organic Acid applied to the High Cal Lime will produce rapid calcium availability and increase pH.
