GENERAL INFORMATION

Nature Safe 9-0-9 is formulated as a highly concentrated fertilizer providing excellent root and shoot stability with controlled plant growth. It is well suited for areas of nitrogen and potassium deficiencies. Nature Safe 9-0-9 contains various meat by-product meals which provide nitrogen that will slowly release over a 7-8 week period. Nature Safe 9-0-9 is non-burning and very low in salt. Most all of the product is utilized through complete plant uptake, minimal leaching and volatilization. Nature Safe acts as a sponge in retaining moisture and nutrients for plant use, especially in sandy soils.
